Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

The attorney of record gave a detailed overview of the applicant's invention (claim 1), and how, in his view, the teachings of the cited reference (Mast) did not teach the claim limitations of the present application. The attorney explained that the present invention intends to overcome the shortcoming of Mast, in that the present invention replaces the contents of the Video Frame Buffer with substitute pixel data, in addition to replacing the portions of the pixel data of the background image with substitute pixel data before a new window is laid over the background image. The attorney agreed to amend the claims to clearly establish this, and highlight other potentially novel features of the applicant's invention in the claims.
